SPEAR & JACKSON

BRICK WORKING TOOLS

CRAFTSMAN MADE QUALITY FOR OVER
TWO HUNDRED YEARS

Through a combination of advanced technologies, optimum design and a commitment to quality, we are able to offer a comprehensive range of Brick working tools for the Professional and DIY user alike.

WHS Brick, Pointing and Gauging Trowels are all designed with the professional user in mind.

Under the Spear & Jackson brand there is a comprehensive range of brick working product for both the trades man and DIY user.

So, whatever your target market, customer expectation levels and sourcing criteria, WHS and Spear & Jackson are the best and only ranges you should turn to.

BRICK WORKING TOOLS

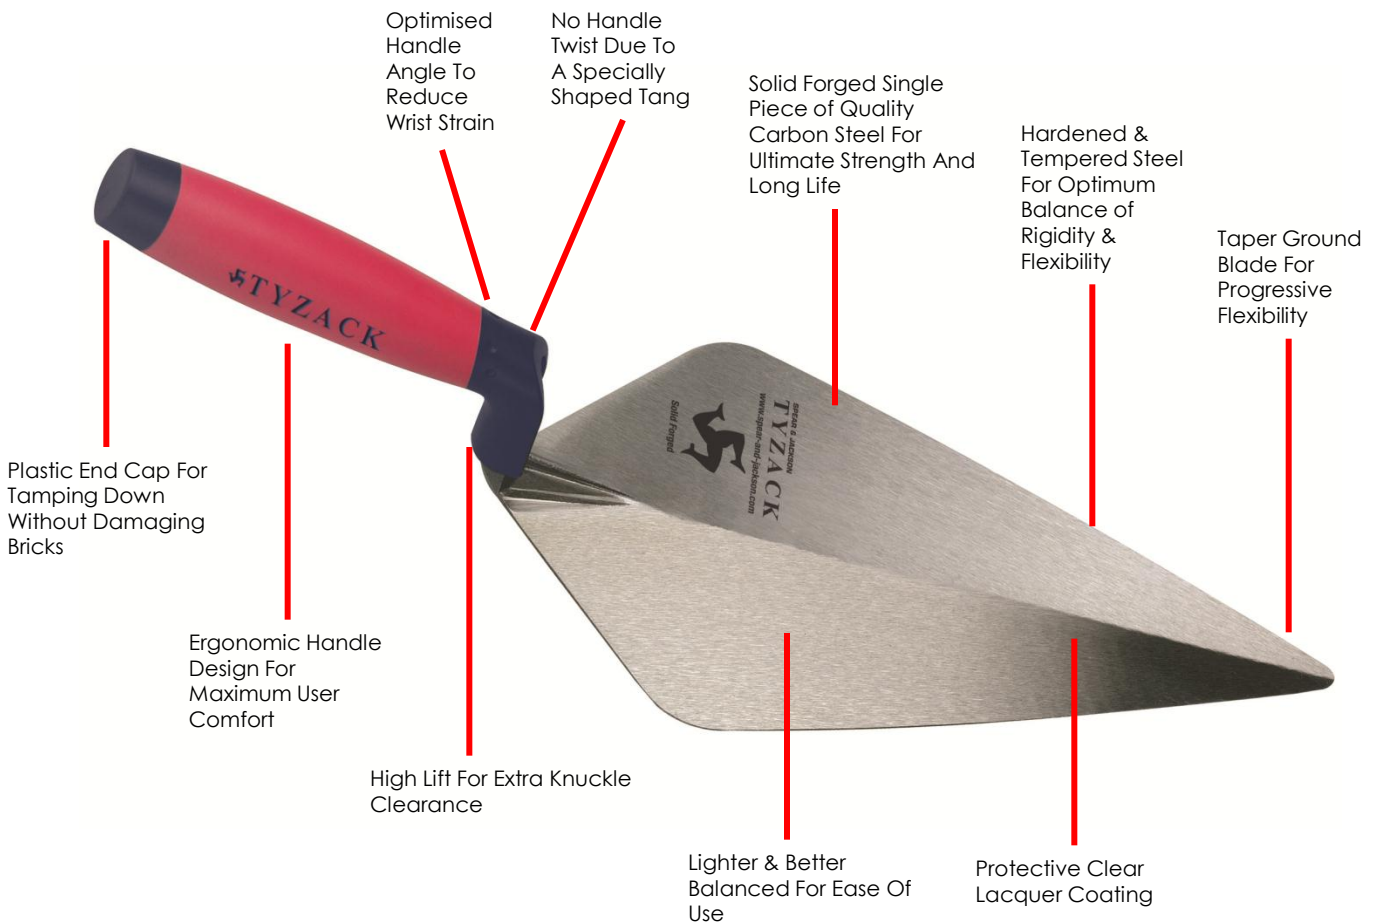

Brick Trowels

WHS was originally started in 1793 and the initials stand for William Hunt & Sons of Brades Steel Works. They were acquired in 1962 by Spear & Jackson who inherited the WHS name. In the building trade, the WHS initials are affectionately referred to as "Work Hard or Starve".

The brand leading brick and pointing trowels are roll-forged from one solid piece of metal, a skilled job and one which is little changed since it first began so many years ago. Despite technological advances, it is still very much a hand crafted product with heavy reliance on the skill of the operator to roll it correctly.

By expertly bringing together advanced technology, the best design and a continuing commitment to total quality, we offer a comprehensive range of superb pointing and brickwork trowels.

Each of our trowels is still roll forged from the finest carbon steel for supreme strength. Handles are available in both traditional wooden or the latest soft feel ergonomic design. WHS is still the first choice for ultimate comfort and performance.

BRICK WORKING TOOLS

Brick Trowels

Brick Trowel 250mm

- Carbon Steel Blade
- Blade Size 250mm x 123mm x 1.57mm

PLASTERING TOOLS

A HISTORY OF QUALITY IN PLASTERING

Ever since Joseph Tyzack introduced steel blades to replace traditional wooden trowels in the late 19th century, the TYZACK name has set the standard for quality plastering tools. Another innovation was a patented design enabling the blade to be attached to the tang without the need for the rivets to go right through the blade thereby ensuring a totally smooth finish. Importantly, all **TYZACK** trowels are hand 'dished' by time served craftsmen to create a convex blade, solving the problem of 'drag lines' when finishing.

Additional features such as hardened and spring tempered blades also ensure that **TYZACK** tools are strong, durable and give outstanding performance. Available in both carbon and stainless steel with a variety of blade sizes and ergonomic handle options, **TYZACK** is the ultimate in comfort and performance.

'READY TO GO' FINISHING TROWELS

Pre-worn to professional standards, our revolutionary trowel is **READY TO GO** right from the start! Featuring 'rounded' front corners to prevent 'drag-lines' and a pre-worn 'fine edge' on both sides for ultimate control in the finish.

PLASTERING TOOLS

Plastering Floats

Plasterers Float 280mm

- Blade Size 280mm x 114mm x 0.57mm
- Carbon Steel Blade
- Aluminium Tang
- FSC Timber Handle

Part No. SJ-380 **Barcode** 9312791032896 **Pack** 6

Plasterers Float 280mm

- Blade Size 280mm x 114mm x 0.57mm
- Carbon Steel Blade
- Aluminium Tang
- Ergonomic Soft Grip Handle

Part No. SJ-550 **Barcode** 9312791014342 **Pack** 6

Plasterers Float 280mm

- Blade Size 280mm x 120mm x 0.59mm
- Carbon Steel Blade
- Aluminium Tang
- Ergonomic Soft Grip Handle
